

Steps to add download feature in Human Workflow

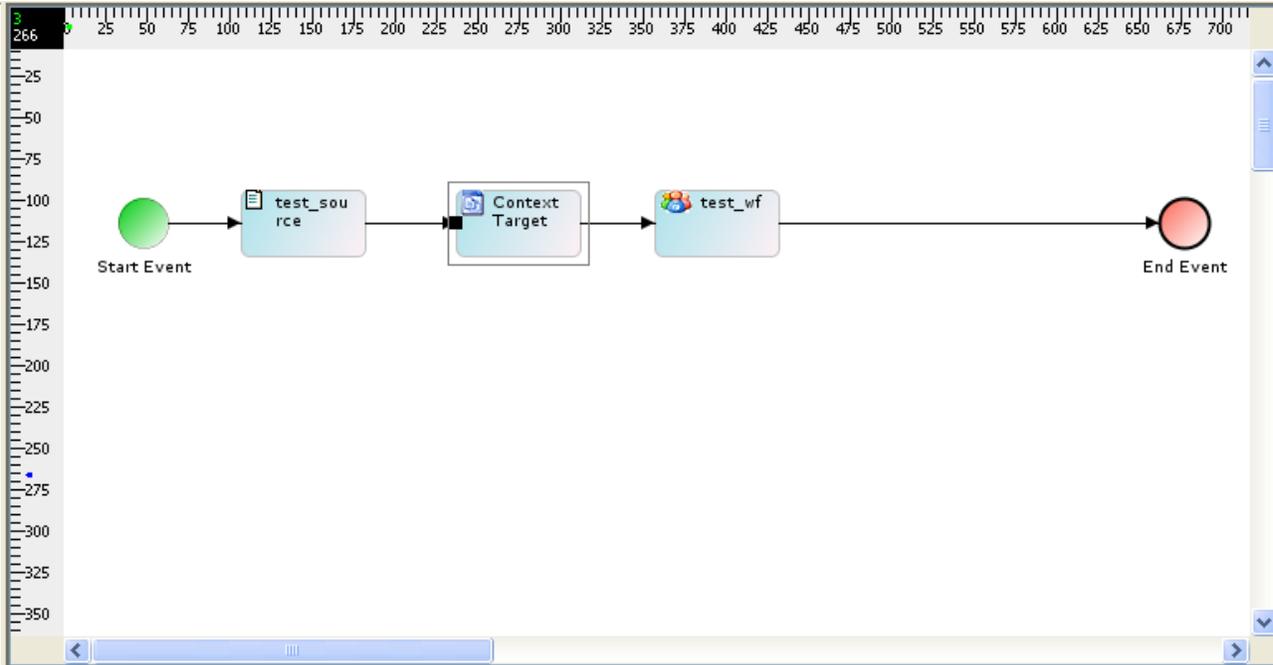

1. Add “ <!DNLOAD#UPLOAD!> “ in your HTML code according to place in your form where you want to display the “Download document “ tab.
2. At the creation time of workflow select “ attach and view” in “Documents Attach / View” field as shown below

The screenshot shows a configuration form for a workflow. The fields are as follows:

- Name *: test_wf
- Description *: test_wf
- User(s): A dropdown menu is open showing options: None, admin (Default Administrator), demo_manager (demo manager), and demo_supervisor (demo supervisor). 'admin (Default Administrator)' is selected.
- Role(s): None
- Task Priority *: Immediate
- Task Due for *: 01 dd 00 hh 00 mm
- Task Expires after *: Never dd 00 hh 00 mm
- Defer task to colleague upon Due date:
- Defer task to manager upon Due date:
- Documents Attach/View: Attach and View (This dropdown is circled in red)
- Repository Folder: (empty)
- Web Form *: patrick (patrick)
- Email Body: (empty)

3. While designing the process flow use file source (document to want to make downloadable) and use context target after that and then human workflow.
4. Double click the Context target activity.
5. Go to context target properties and select “ true” in Document Repository field and give any name to the file that you want to be downloadable like “ display .txt” in File name field.

See the below screenshot

Properties OnException Scripts Alerts Process Flow Variables Comments

Name	Value
Activity Maximum Retries on Failure	0
Activity Wait Time(in seconds) between Retries	60
Character Set Encoding	ISO-8859-1
Document Repository	true
File Name(with full path)	display.txt
ID	
Label	ContextTarget
Name	ContextTarget
