AdeptiaSuite Upgrade from 5.2 to 5.3 SP1

Assumptions / prerequisites:-

Has the admin rights of the Adeptia User is available (Yes/No)?
Has the right for database backup available (Yes/No)?
Has the access credential for the server is available (Yes/No)?
Has shared location for backup files are available (Yes/No)?

Backup:

1. Before applying the patch, it is recommended to take the backup of the database that is used as backend by Adeptia Suite. If you are using HSQLDB as backend and log database then copy "embeddedDB" folder that is located in "AdeptiaSuite-5.2\AdeptiaServer\ServerKernel". Make sure to copy this folder outside Adeptia.
2. Take a copy of server-configure.properties file.

Download and Upgrade:

1. Open the following link http://www.adeptia.com/products/downloads.html .
2. Select the appropriate Adeptia Suite product that is currently installed on your machine and you want to upgrade.
3. Click on Download button and follow a simple registration step to reach to Product latest release/upgrade download page. Refer Appendix A to understand the download page structure.
4. Please follow below upgrade path for downloading and upgrading the patches: (See below screenshot for more info.)
    a) Refer section a) in below screen.
