Contents

ADEPTIA

Patch Details

Patch Name   **:**   **AdeptiaSuite_6_0_SP1_12Aug2013.zip**

Build Tag   **:**   **Release_6_0_SP1_05_12Aug_2013**

Applies To

This patch can only be applied on Adeptia Suite Ver. 6.0 SP1 and Ver.6.0 SP1 with any maintenance patches.

List of Changes

Following table lists the enhancements and bug fixes that are covered in this patch.

Enhancements/Bug Fixes	Description/User Story
Version Tag : Release_6_0_SP1_05_12Aug_2013	
Enhancements	
Configurable option to execute parent flow and all its child flow on same node	A configurable option is added in Process Flow property to execute the parent flow and all its child flow on same node when Adeptia Suite is running in clustering environment.
Recovery support for EDI solution	EDI Process flows are now made recoverable. In case kernel crashes, the execution of running EDI process flows will be recovered when you restart the kernel.
Support to run EDI solution in Clustering environment.	Support is added to run EDI solution in Clustering environment to achieve load balancing.
Bug Fixes	
Issue in signing WS-addressing header in WS Consumer (Ticket #2502)	In Web Service Consumer, when you sign the WS-addressing parameters using signing option of the Security Policy then the WS Consumer fails with error "<PartName> is not in the message".

AS-3660	Process Designer applet doesn't open when JRE 7 is installed.
AS-3425	When you try to insert XML data of more than 4000 character in XML Data type field of Oracle database, then the insertion fails with the error.
In File Event, VFS option always comes as selected. ([Ticket #2816](#))	If you create a new file event and then open it in edit mode, it will show you VFS options as selected irrespective of that you haven't selected it at the time of creation.

Enhancements/Bug Fixes	Description/User Story
Version Tag : Release_6_0_SP1_05_15July_2013	
Bug Fixes	
Space is not allowed in Partner ID and Host ID in Trading Partner (Ticket # 2716)	Support is added to allow space in Partner ID and Host ID fields in Trading Partner activity.
Duplicate sequence checking issue for ISA (Ticket #2723)	Duplicate sequence checking doesn't work for ISA.
SE01 does not give Correct no of segments (Ticket #2741)	Fixes are done to generate the correct number of segment counts in SE01 when ST control number is generated from data mapping activity.
FTPS Issue with on File Create option (Ticket #2714)	When FTP event is configured with *FTPS* and *On File Create* option, then FTP event doesn't pick the new file.
Applets does not get opened when routed through the Apache SSL proxy (Ticket #2658)	Applets does not get opened when routed through the Apache SSL proxy.

Enhancements/Bug Fixes	Description/User Story
Version Tag : Release_6_0_SP1_04_01July_2013	
Bug Fixes	
AS- 3149	When we restart the Adeptia Server, and JMS Event is activated then event does not pick the messages in the next polling Frequency while messages exists in the Queue.
AS- 3409	When we keep the rich form design window idle for more than 60 sec then an error message "The action could not be completed. This can happen if your session expires or if you are editing the same form/flow in multiple sessions." is displayed if we create form after 60sec.

Enhancements/Bug Fixes	Description/User Story
Version Tag : Release_6_0_SP1_03_28June_2013	
Support to create Target file per *Transaction Set Process Count* in B2Bi processing.	In B2Bi Processing, if the target file is XML and the source file has more than 2000 transaction set, then invalid XML file is created. Now a new option "*CreatePerTransactionSetProcessCount*" is added in *Mode Type* drop-down list of *Inbound Relationship* page.
Support to checkout activity directly from SVN repository into Adeptia Suite	Support is added to checkout activity directly from SVN repository into Adeptia Suite.

Enhancements/Bug Fixes	Description/User Story
Version Tag : Release_6_0_SP1_02_19June_2013	
Support to skip compliance for EDI X12 ISA and GS segment	Support is added to skip the compliance check for EDI X12 ISA and GS segment.
Support to generate ISA, GS, and ST segment from the incoming data.	Support is added to generate ISA, GS, and ST segment of outgoing EDI X12 message, from the mapped value of the incoming data. Earlier these segments were generated based on values given the respective relationship.
Support to re-concile 999 and TA1	Support is added to re-concile 999 and TA1 acknowledgment.
Support for repetition separator in EDI X12 outgoing Processing. (Ticket #2601)	Support is added to generate repetition separator in EDI X12 outbound message.
Support to allow less field in Advanced text Schema	In Advanced Text Schema, support is added to process the record even if number of fields in the source record, are less than the number of fields defined in the Schema.
LDAP bug fixes Following LDAP bugs have been fixed:	
AS-3292	When SSO is enabled and user login with Adeptia login page and alwaysDefaultLogin property is enabled then LDAP group configured in administrator group or business group properties does not come into effect.
AS-3291	When SSO, alwaysDefaultLogin is enabled, and no group exists in the request then a NullPointer exception is displayed on GUI.
AS-3021	When SSO is enabled, and you login as sysadmin user then some of the administrative features are not displayed.
AS-3294	When alwaysDefaultGroupLogin is enabled and you configure the name default adeptia group in 'abpm.ldap.administratorGroups' or 'abpm.ldap.businessGroup' then user is created accordingly these properties and no LDAP group is checked.

Issue while executing RestWS with no parameters) (AS-3008)	When you execute a REST WS (with no parameters), then "HTTP Respond code: 500" error is displayed.
Support to handle repetition separator	Support is added to handle the repetition separator in EDI X12 Inbound and outbound processing.
Support for Processing ST03	Support is added to process ST03 in EDI X12 inbound and outbound processing.
Performance Improvement in EDI message processing using parallelism.	EDI message processing performance has been improved using parallel processing.
Support to validate XML at target side.	Support to added to validate target XML in inbound processing.
